

FAQs about Fenix RC09

1. What is the product positioning of the RC09?

RC09 is the regular RC09Ti that made of aircraft grade aluminum alloy. This magnetic charging flashlight is compatible with 16340 Li-ion battery, compact but with outstanding performance. Cold-resistant CR123A battery also can be taken, RC09 must be the solid choice in daily carry, hiking and camping.

2. What are the key features and benefits of RC09?

- 1) Magnetic suction charging
- 2) Dual-purpose charging cable with magnetic charging&Micro USB port
- 3) Powered by one 16340 rechargeable Li-ion battery
- 4) Two-position body clip and magnetic suction bottom
- 5) One-switch operation, double-click lock function
- 6) Compact and handy

3. Can RC09 be rechargeable when CR123A battery is taken? What are the risks?

No, definitely NOT. At first, CR123A battery is non-rechargeable battery. And if charges the RC09 with CR123A battery in it, the charging process will not be intercepted because of the charging cable is not able to identify the battery type. So please do take care of the battery usage in case of battery leakage, damage and circuit erosion caused by misuse of battery.

4. Can the rechargeable batteries with no protection circuit be taken in RC09? What are the risks?

The RC09 will work normally when rechargeable batteries with no protection circuit are taken. But if these kinds of batteries are charged by the users, the batteries risk combustion and even explosion because of over charging. So the users would better take this: Do NOT use the rechargeable batteries with no protection circuit.

5. Is the charging cable available simultaneously in magnetic charging and USB charging?

Yes, only if the electricity current is heavy enough, while the charging time could be prolonged.

6. Is the charging cable used as data connection cable?

No, the cable only applies to devices charging.

7. Is the charging cable of RC09 commonly used for RC09Ti?

Yes, it is.
