

HOW TO AFFIX YOUR CHARGING DOCK TO SURFACES

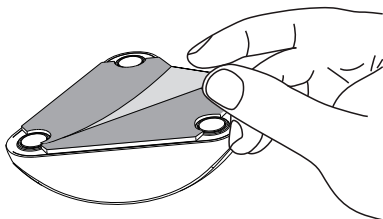

1. Remove the plastic film from one side of the anti-slip pad.

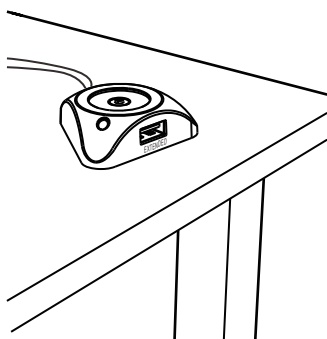

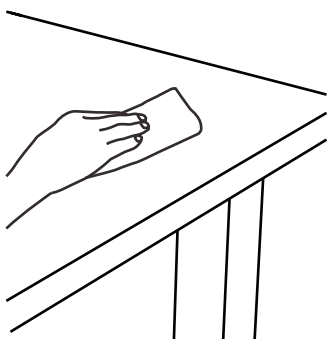

2. Making sure the anti-slip pad is aligned with the bottom of the charging dock, press the exposed side down onto the bottom of the charging dock.

3. Then remove the plastic film from the other side and press the dock, bottom side down, to the desired location.

4. Before placing the charging dock on any surface, make sure the surface you attach the charging dock to is clean from any dust or debris.

5. To change the location of the charging dock, firmly grip the base of the charging dock and pull up. Apply the dock base to the new area and press down firmly, making sure that the surface you are reattaching to is clean.

CLEANING

To clean the anti-slip pad, rinse with water. Do not use fiber cloths to wipe, as it will leave debris behind and cause the pad not adhere properly to surfaces.
